Instructions: Find the underlined words in the above find-a-word.

Seasons are the regular changes in weather experienced throughout a calendar year. There are four seasons: Summer, Autumn, Winter and Spring. As the earth takes a year to revolve around the sun, the seasons change depending on which side of the earth is facing the sun. Each season lasts for three months, with summer being the warmest, and winter the coolest.

S	O	N	A	R	J	E	Y	R	A	M

Instructions: Find the underlined words in the above find-a-word.

Christmas is celebrated annually on the 25th of December. On this day, Christians celebrate the birth of Jesus, God's son, in Bethlehem.

Jesus was born to parents Mary and Joseph, who returned to Bethlehem under an order for all people to return to their home towns so they could be taxed. There was no room at any of the inns, so Mary gave birth to Jesus in a manger. Angels appears to shepherds in the field, singing praises that the Saviour had been born.

Instructions: Find the underlined words in the above find-a-word:

A fossil is the preserved remains of a plant or animal. They are rocks. Fossils are rare because an organism needs to be quickly covered by sediment in order to be turned into a fossil. The fossilisation process takes ten-thousands years. Most fossils are uncovered when rocks are worn away by wind and water. They are found all over the earth, with the largest ones being those of the dinosaurs.

Instructions: Find the underlined words in the above find-a-word.

Trees are living things. They are plants that grow from seeds. The structure of a tree includes a root system, trunk, branches, twigs and a crown of foliage. Trees are regarded as the lungs of earth, filtering out dust and converting carbon dioxide into oxygen. They are also the home to many animals, provide shelter to human, timber for construction and edible fruits, nuts, seeds, flowers and even bark.

Instructions: Find the underlined words in the above find-a-word.

The human body is a complex machine. It is made up of cells, organs and tissues. Around 60% of the body is water. A baby is born with 270 bones, and this decreases to 206 by adulthood. The brain is the control centre and takes in information from the five senses (sight, hearing, smell, taste and touch). The heart pumps blood around the body, keeping it alive.

M	S	E	L	C	I	T	R	A	P	P
A	T	O	M	S	E	G	N	A	H	C

Instructions: Find the underlined words in the above find-a-word:

Everything - including you - is made of matter. Matter is made up of tiny particles called atoms. On earth, matter comes in three forms: solids, liquids and gases. Through heating and cooling, matter can change its state. Ice is a solid, but when it is melted, it becomes a liquid (water). Heating liquid turns it into a gas (water vapour).

Instructions: Find the underlined words in the above find-a-word.

The Grand Canyon is located in the US State of Arizona. It is not the largest canyon in the world, but is one of the most popular for tourists to visit. The canyon was formed million of years ago through the erosion of the rock walls by the Colorado River which runs through it. The canyon is thought to be between 5 and 70 million years old. It supports an abundance of life, including Native American tribes, and is an important site for geoscientists.
